**PAINT WIPES OFF
WITH DAMP
MICROFIBER CLOTH**

E-Z CLEAN GOGGLES™

NO MORE MESSY GOGGLES

Trimaco's E-Z Clean Goggles™ are the perfect companion for any water based paint job. Simply wipe with a damp microfiber cloth and watch the paint disappear. The light weight goggles will keep you comfortable on the job. E-Z Clean Goggles provides peace of mind with its anti-scratch, impact resistant and 99.9% UV resistant qualities. These goggles have been designed with an anti-fog and anti-oil/dust treatment to keep you working. Can be worn with most half-mask respirators.

TO USE: Before each use inspect goggle for damage or wear. Place the safety goggles around your head. To clean, wipe with a damp microfiber cloth.

CAUTION: Overcleaning this goggle with water is not recommended as treatments may be removed. Store out of direct sunlight, in a clean case when not in use. Do not use for burning, cutting or welding with torches or electric welding. Do not use for sports. Goggles meet ANSI Z87+ requirements. Lens is impact resistant but not unbreakable or shatterproof. Do not use for protection against explosions, fragmenting grinding or abrasive wheels or other severe impacts. When scratched or damaged, vision and impact resistance is seriously reduced. Inspect and clean frequently during use; replace immediately if damaged. For high impact flying particles, a full face shield used with this goggle may be required.
