AQUA SHIELD®

FLAME-RETARDANT PROTECTION

Used for covering any surface during the manufacturing, building and repair processes. With its quadruple duty protection, Aqua Shield is flame-retardant, leakproof, slip resistant and durable. It also provides dust-free protection and can be recycled once you're finished with it. Initially, this product line may seem more expensive than traditional surface protection products, but when its superior features are taken into consideration, these products truly become a better value.
